

JOB OFFER

Fish feed production manager

The cooperative Company **KONJI FARM** aims to operate in accordance with the permaculture's fundamental principles. We want to promote a global ethic and method that drives the design of systems integrated into a sustainable development strategy, where human activity highlights natural ecosystems, and is carried out in harmony and interconnection with them, with a constant focus on efficiency, sustainability and resilience.

Assignment

Produce high performance fish feed without chemical inputs, allowing accelerated fish growth with high quality.

Duties

- Seek, test, and develop feed formulations, based on processes that respect biodiversity, for increased productivity gains.
- Define feed production objectives based on available resources.
- Establish detailed specifications for feed production.
- Select and organize input supply.
- Create a database from the obtained results, in order to facilitate decision making on the formulations and production techniques to adopt.
- Assist in research and development.
- Ensure traceability of feed.
- Implement a system for testing the developed feed's performance.
- Budgeting and organizing purchases for equipment, inputs, and workforce to carry out the production.

- Supervise the designated workers/technicians to assist the production.
- Ensure production equipment maintenance.
- Research and suggest the feed packaging method, in line with the farm's values (organic packaging).
- Work closely with the fish farming manager to ensure optimal results.
- Prepare and submit weekly reports on feed production and budget monitoring.

Educational background

Aquaculture production skills, specialized in feed development

Education levels

Bachelor's degree
